

“ Training the next generation of scientists on the front-line dealing with global change ”

TESS in a nutshell

TESS offers an **advanced course for selected students** common to four Master's degrees from the **University of Toulouse III Paul Sabatier**.

At no extra cost, the programme runs concurrently with the two-year Masters for an **additional 30 ECTS**.

What's in it for me?

- Access to **world-class research facilities**
- **International exposure** through our network
- **Mobility grants**
- Innovative, interdisciplinary courses with an emphasis on **learning by doing**
- **Master-PhD-employment continuum**

Master's programmes

-  Biodiversity, ecology, evolution
-  Science of the universe and space technologies
-  Earth and planetary sciences, environment
-  Ocean, atmosphere and climate sciences

Fields of research

- Monitoring and understanding the Earth
- Exploring our place in the universe
- Addressing challenges of natural resources and the environment
- Forecasting and predicting future behaviour
